WHY INVEST IN DUBAI

Strategic location

Dubai sits at the crossroads of Europe, Asia and Africa.

Highly liquid property market

Logistically, it's very easy and relatively inexpensive to invest in property in Dubai, whilst the following points ensure the property market remains highly liquid:

- Some of the highest rental yields in the world
- Strong capital appreciation
- Readily-available financing options
- Zero Income Tax

Ease of business set up

Free Zones give companies 100% foreign ownership; exemption from all import duties; 100% repatriation of capital and profits; and freedom from corporate taxation.

Safe and very sound

The UAE is one of the safest countries in the world in which to live.

Open and free system

Open economic policies, minimal government control and private sector regulation have played an instrumental role in attracting Foreign Direct Investment (FDI).

World-class infrastructure

Dubai's vision to invest heavily in its transport, telecommunications and industrial infrastructure also make it an attractive destination for international businesses

Stable currency

The UAE dirham being pegged to the long-established and globally recognised US dollar means the value of the currency has enjoyed balance and growth, as well as stability to the import and export trade.
